

DigitalMedia 8G+® 4K60 4:4:4 HDR Receiver and Room Controller

The Crestron® [DM-RMC-4KZ-100-C](#) is a DigitalMedia 8G+® receiver and room controller that supports full 4K60 4:4:4 and high dynamic range (HDR10) video signals. Via a CATx cable, the DM-RMC-4KZ-100-C connects to a DigitalMedia™ switcher or transmitter or to an HDBaseT® source. Connection to a display device is provided by a single HDMI® output. In addition, built-in RS-232, IR, and Ethernet control ports enable programmable control of the display device via a control system.

In the Box

- 1 DM-RMC-4KZ-100-C DigitalMedia 8G+ 4K60 4:4:4 HDR Receiver and Room Controller

Additional Items

- 1 Connector, 4-Pin (2003576)
- 1 Connector, 5-Pin (2003577)

Install the Device

The DM-RMC-4KZ-100-C can be mounted onto a flat surface or rack rail.

Mounting onto a Flat Surface

Using four mounting screws (not included), mount the device onto a flat surface such as a wall.

Wall Mounting

DigitalMedia 8G+® 4K60 4:4:4 HDR Receiver and Room Controller

Mounting onto a Rack Rail

The device can be mounted onto a front or rear rack rail. To mount the device:

1. Position either of the mounting flanges so that the holes align with the holes in the rack rail.
2. Secure the device to the rack rail using two rack mount screws (not included).

Rack Rail Mounting Example

Connect the Device

Connect the device as required for the application.

NOTES:

- The LAN port can be connected to an Ethernet switch only when the DM IN port does not connect to a DigitalMedia switcher.
- The DM IN port is a PoDM powered device (PD) port and is also compatible with HDBaseT PoE:
 - In order for the DM IN port to receive PoDM, the port must be connected to a DigitalMedia switcher or other DigitalMedia equipment that has a PoDM power sourcing equipment (PSE) port.
 - In order for the DM IN port to receive HDBaseT PoE, the port must be connected to equipment that has a corresponding HDBaseT PoE PSE port.

Wiring that connects to a PoDM or HDBaseT PoE port is designed for intrabuilding use only.

PoDM, HDBaseT PoE, or the optional [PW-2407WU](#) power pack (sold separately) can be used to power the DM-RMC-4KZ-100-C.

DigitalMedia 8G+® 4K60 4:4:4 HDR Receiver and Room Controller

Connections, Left and Right Sides

DigitalMedia 8G+® 4K60 4:4:4 HDR Receiver and Room Controller

Refer to the following table for DM IN wiring information.

DM IN Wiring

	Pin Number	Wire Color
	1	Orange/White
	2	Orange
	3	Green/White
	4	Blue
	5	Blue/White
	6	Green
	7	Brown/White
	8	Brown

Upgrade the Firmware

Before using the device, upgrade the firmware. The latest firmware can be downloaded from the [DM-RMC-4KZ-100-C](#) product page on the Crestron website (www.crestron.com).

Determine the IP Address

The physical configuration of the DM-RMC-4KZ-100-C within a DigitalMedia 8G+ system determines how the IP address of the receiver is set:

- If the DM-RMC-4KZ-100-C is connected to a DigitalMedia switcher, the IP address is configured by the switcher automatically. You do not need to set the IP address.
- If the DM-RMC-4KZ-100-C is connected directly to a DigitalMedia 8G+ transmitter (commonly referred to as a standalone configuration in which no DigitalMedia switcher is used), the IP address of the receiver is assigned using DHCP (Dynamic Host Configuration Protocol) by default. If you wish to assign a static IP address, do either of the following:
 - To assign the default static IP address of the receiver, hold down the SETUP button while the unit boots up. The default static IP address, which is 192.168.1.250, overwrites the current setting.
 - To manually set a static IP address other than the default address, use the Crestron Toolbox™ software.

DigitalMedia 8G+® 4K60 4:4:4 HDR Receiver and Room Controller

Observe the LED Indicators

Refer to the following table for information about the LED indicators on the device.

LED Indicator	Color	Meaning
LAN	Green	An Ethernet link is established.
	Flashing amber	Data activity is occurring on the Ethernet link.
SETUP	Red	The SETUP button is pressed.
Power	Green	Power is being applied to the device.
DM IN	Green	A DM or HDBaseT link is established.
	Steady amber	HDCP video is detected.
	Flashing amber	Non-HDCP video is detected.
HDMI	Green	An HDMI signal is detected.
