

ACT-32H UHF Analog Handheld Transmitter

Features

- Aesthetically designed rugged plastic housing features the most comfortable handheld size and presents MIPRO's unique style.
- The unique metal grille of the microphone capsule module can be divided into the upper grille and the lower grille. The upper grille can be detached for cleaning; the lower grille is connected with the housing by an internal thread. The robust metal grille protects the capsule against impact, rolling and pop noise, and ensures clarity of sound.
- An LCD on the housing displays the working channel, battery status and operating information.
- Powered by two AA alkaline batteries.
- Pairs with MIPRO's capsule modules featuring high dynamic range for loud singing without distortion. The patented capsule suspension design virtually eliminates vibration and handling noise
- A color-coded channel identification ring is put on the end of the housing which has a built-in high efficiency antenna.

Specifications

Frequency Range	UHF 480 – 934 MHz (country dependent)
Bandwidth	24 MHz
Display	LCD
Mic. Capsule Modules	Interchangeable condenser or dynamic capsule module
RF Power Output	30 mW (country dependent)
Spurious Emission	< 4 nW
AF Sensitivity	Preset at 0 dB (equal to capsule sensitivity)
Battery Type	Two AA alkaline
Dimensions	51 × 234 mm (Ø × L)
Weight	Approx. 250 g
