

B-G1-WPK

Water Resistant Covers for CNX-B Designer Keypads

B-G1-WPK covers are great for protecting [CNX-B](#) Designer Series Keypads wherever they may be exposed to moisture or dampness such as basements, pools, boathouses, bathrooms, laundries and garages. Each kit contains four urethane covers, which install easily over a CNX-B keypad equipped with the standard single-gang plastic faceplate. Without hindering normal use, they effectively prevent liquids and other airborne materials from settling onto, or into, the keypad.

Please note that Crestron® keypads are not intended to be exposed to the elements or used under conditions exceeding the environmental limits of 32° to 113°F (0° to 45°C), 10% to 90% RH (non-condensing).
